

Abstract of the Disclosure

234891.B11

Case	Age	Sex	Duration	Location	Findings
1	25	M	10 years	USA	Small, well-circumscribed, nodular lesion in the dermis, composed of nests and cords of basaloid cells, with a fibrovascular core.
2	35	F	5 years	USA	Large, well-circumscribed, nodular lesion in the dermis, composed of nests and cords of basaloid cells, with a fibrovascular core.
3	45	M	15 years	USA	Small, well-circumscribed, nodular lesion in the dermis, composed of nests and cords of basaloid cells, with a fibrovascular core.
4	55	F	20 years	USA	Large, well-circumscribed, nodular lesion in the dermis, composed of nests and cords of basaloid cells, with a fibrovascular core.
5	65	M	25 years	USA	Small, well-circumscribed, nodular lesion in the dermis, composed of nests and cords of basaloid cells, with a fibrovascular core.
6	75	F	30 years	USA	Large, well-circumscribed, nodular lesion in the dermis, composed of nests and cords of basaloid cells, with a fibrovascular core.
7	85	M	35 years	USA	Small, well-circumscribed, nodular lesion in the dermis, composed of nests and cords of basaloid cells, with a fibrovascular core.
8	95	F	40 years	USA	Large, well-circumscribed, nodular lesion in the dermis, composed of nests and cords of basaloid cells, with a fibrovascular core.
